Experience

Rightsline, Manager of Application Development

July 2017 - Present

Lead the financial team with two direct reports working on C# backend to calculate royalties, allocation, and amortization schedules all fully supporting cross currency triangulation. Rewrote frontend from JavaScript AngularJS to Angular v20 with TypeScript. Wrote unit tests with Jest and Wallaby.

LiveAuctioneers, Senior Software Engineer

May 2016 - May 2017

Migrated legacy PHP website to AngularJS and then again to React. Developed and maintained NodeJS backend microservices.

1-800 Contacts, Mid Software Engineer

December 2014 - May 2016

Developed solutions for main Demandware website and implemented new functionality on C# backend services. Worked on React frontend rewrite. Led development of canceled ocular themed retro FPS

[Contacts Quest](#).

Towers Watson, Software Engineer

July 2013 - December 2014

Worked on a team to maintain various internal WPF and Silverlight programs and implement new features for the outward facing FubuMVC websites.

NPEC, LLC, Software Engineer

May 2012 - July 2013

Designed and developed internal ASP.NET web projects and a call center WinForms desktop application, supported the deployments in production, and assisted other developers in a team environment.

Personal Projects

[Game Development Beyond the Basics](#)

January 2024 - Present

Created YouTube video tutorials for C# and the Unity game engine covering topics like AI Navigation, Animation w/ Playables API, and Scene Serialization.

[Itch.io Page](#)

Games I worked on are available to play on my Itch.io page. There is a commercial title, several small game jam games, and a few prototypes that are playable.

[Déjà Vu](#)

May 2016 - June 2020

Sole programmer for a multi-platform puzzle game released on Xbox and Steam. The game was developed in Unity, features accessibility options like colorblind mode, and is localized in 13 languages. Déjà Vu was well received and has a 4.7/5 star rating on Xbox.

[Personal Site](#)

Feb 2004 - Present

Collection of games, tools, software, and websites I've worked on over my 20+ years as a programmer. Technologies for these projects include: C#, WPF, AngularJS, Unity, BlitzBasic, XNA, Flash, Unreal 3.

Education

Bachelor of Computer Science

August 2009 - March 2012

Neumont University, South Jordan, Utah
